### **October Technical Talk :**

### **Wheel Flange and Rail Lubrication For Noise, Friction & Wear Management By Mr. Andre' Kofmehl and Alfred Yeow of Igralub**

**Monday 17<sup>th</sup> October 2005**

Mr. André Kofmehl, Director of Igralub AG, Switzerland, will address his talk to the latest technology of high quality lubricants for wheel and rail maintenances. He will review and compare the variety of existing lubricants and systems of wheel flange and top of rail treatment (friction modifier) which are found in the market.

Mr Kofmehl's main focus will be the presentation of latest Igralub Rail Lubrication and Friction Management system against noise in curves.

With tests analyses, pictures and videos you will have the opportunity to get accurate information of latest wheel/rail adhesion technology. This includes also the new development of Derailment Detector-System by Siemens Germany.

It is understandable that the presentation will have a touch of Swiss Advanced Technology which is found at railway operators throughout the whole world. All members are welcome to join the talk and lets' see how Andre' would change our mindset putting grease on top of rail.

**Venue** : **2/F, Auditorium, MTRC Headquarter, Kowloon Bay**

**Date** : **Monday 17<sup>th</sup> October 2005**

**Time** : **6:00 pm for a prompt start at 6:30 pm**

Wong Man Tat  
Mainland Affairs Secretary, CHPWS
